

ABDUL ARSATH

Full-Stack Developer

+91 82207 42297 | abdularsath79@gmail.com | [Linkedin](#) | [GitHub](#)

PROFILE

Computer Science Engineering student with hands-on experience in full-stack web development using React.js and Tailwind CSS. Built responsive web applications, AI-based tools, and automation projects as part of academic and personal work. Familiar with REST APIs, databases, and basic UI/UX principles. Seeking an entry-level Full-Stack or Frontend Developer role to learn, contribute, and grow in a startup environment.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Responsive Design, UI/UX

Backend Development: SQL, MySQL, REST APIs, Node.js (Basic)

AI & Automation: NLP, Generative AI, UiPath, Hugging Face Transformers, Streamlit

IoT & Embedded Systems: Arduino, ESP32, Sensors, Relay Modules, Home Automation

Developer Tools: Git, GitHub, VS Code, Figma, Arduino IDE

PROJECTS

Personal Portfolio Website

- Developed a personal portfolio website using React.js and Tailwind CSS
- Showcased projects, skills, and contact information
- Optimized for responsiveness and fast loading performance

Tech Stack: React.js, Tailwind CSS

AI-Powered Text Summarizer

- Developed an NLP-based text summarization tool using Hugging Face Transformers (BART Large CNN)
- Converted long documents into concise, meaningful summaries
- Improved readability and content consumption efficiency

Tech Stack: Python, NLP, Hugging Face

Spice Haven – Responsive Restaurant Website

- Designed and developed a fully responsive restaurant website using HTML, CSS, and JavaScript
- Implemented modern UI, menu showcase, chef highlights, and online reservation form
- Ensured cross-browser compatibility and mobile-first responsiveness

Tech Stack: HTML, CSS, JavaScript

Speech-to-Text System with Noise Robustness

Developed a real-time speech recognition system using Python, Whisper AI, Tkinter, and NumPy

Implemented live transcription with audio visualization and noise-robust processing

Optimized for high transcription accuracy using dual-pass ML processing

Applied audio engineering techniques to improve voice recognition in variable environments

Tech Stack: Python, Whisper AI, Tkinter, Audio Processing, Multithreading

SupportTalk – Real-Time Speech-to-Text System

- Developed a real-time speech recognition system using Python, Streamlit, Wav2Vec2, and Whisper AI
- Implemented live transcription with volume meter visualization for customer support automation
- Optimized for low latency and high transcription accuracy
- Applied NLP techniques to convert voice input into actionable text

Tech Stack: Python, Streamlit, AI Models, NLP

ALEX – IoT-Based Smart Computer Lab Assistant

- Developed an IoT-enabled lab assistant using ESP32 and sensors
- Automated device control and lab monitoring through voice commands
- Improved operational efficiency using automation logic

Tech Stack: ESP32, IoT Sensors

EDUCATION

**B.E – Computer Science Engineering
(Pursuing)**

Anna University | Expected 2026

Diploma in Computer Engineering

DOTE | PERCENTAGE: 79%

CERTIFICATIONS

- Generative AI in Action (IBM SkillsBuild)
- Introduction to Artificial Intelligence (LinkedIn Learning)
- Robotic Process Automation Foundation (UiPath)
- Software Engineering Job Simulation (Forage)
- GenAI Powered Data Analytics Simulation (Forage)
- Solutions Architecture Simulation (Forage)
